OUR **STORY**

Founded in 2019, Benderang Hidup Indonesia is a company committed to helping companies and social projects to grow significantly through our mechanical, electrical, and mechatronics specialization.

The company name is chosen as a **declaration of faith** that Indonesia, as well as other countries, will live in peace and prosperity. Anytime the company name is mentioned, agreement towards peace and prosperity is built. Aiming towards this vision, we support both companies and social projects to **thrive** in their domains. **Our growth is in helping others to grow.**

In the strive for excellence and professionalism, the company has earned the reputation for setting a climate for a sustainable relationship with clients by continuously listening to customer needs and concerns, solving problems, and helping companies experience growth.

As an **electrical specialist**, we supply breakers, contactors, overload protection, cables, MCC panel, power meters, sensors, proximity switch, and encoder, control devices, such as variable frequency drives (AC and DC), soft starts, UPS, motors, gearbox, and even lighting fixtures.

As a **mechanical** specialist, we supply and work on piping systems (air, gas, water, steam), hydraulic systems, hydraulic equipment, and any kind of machine installation and maintenance.

Our **mechatronics** experiences include preparing infrastructure for robotic machines, unloading and installing robots, and maintaining the robotics resources of our clients.

We install electrical and mechanical products like transformers, switchgear, MCC panel service, and many kinds of machines. We perform testing, commissioning, hazard preventing, maintenance, automation, and provide energy-saving solutions.

Our team is made up of technically proficient and devoted individuals collaborating to offer value-added solutions at a reasonable price framework to meet your requirements.

To amp our service, we are constantly developing our methods and technologies, training our people, and improving our services in order to better serve our clients.

We look forward to supplying your organization with our goods and services. You may be confident that we live up to our service commitment.

"Benderang Hidup Indonesia is your teammate for significant growth!"

OUR BUSINESS

Benderang Hidup Indonesia

Collaborative Robots (COBOT).

Collaborative robot is a type of robotic automation designed to operate securely alongside to human workers in a shared workspace. In most cases, a human worker completes more complex and sophisticated activities while a collaborative robot handles repetitive, mundane tasks. Collaborative robots are meant to supplement human workers' intelligence and problem-solving abilities with their accuracy, uptime, and reproducibility.

Uses

- Inspection of Goods/Material
- Pick and Place
- Mixing-Formulating-Blending, Machine-Tending, Packaging and Palettizing, etc.
